

## New from St Chad's

We are still protected under His wings.

Things have changed in South Africa. We are having a 2nd corona surge. This time it is so fast: 10 000 people are infected daily in Kwa Zulu Natal, Eastern Cape and Western Cape are worse. 200 death daily. Scientists have identified a new corona virus just like in UK.

The big problem is that youths don't care and they are infecting the elders. I think the government doesn't know what to do. We must just pray hard for this situation.

We are attending church services and observing corona protocol. We did not have carols but will be having a service on Christmas Day at 8am.

Early next year will be election of a new bishop. We are praying hard for the right person to serve His people.

*Ringing the bell for prayer at St Chad's*

We are waiting for rain in the North West though other provinces are experiencing floods and severe thunder storms. My garden is doing very well this summer, we are having onions, green beans and spinach.

We wish all the churches a Happy Festive season and are praying for you all.
